he purpose of Introduction to Type® and Teams is L to help you understand your Myers-Briggs Type Indicator® (MBTI®) tool results and the relationship of those results to your work on a team. While the tool has been used successfully with individuals, its power can be multiplied when applied to teams, as its use worldwide in teambuilding attests.

This booklet presents a framework designed to assist teams in functioning more productively. The MBTI tool is useful to teams because it is based on the idea that we all have unique gifts to offer and challenges to overcome. In teams we work together, attempting to maximize each member's special talents, thereby minimizing gaps in knowledge and skills. Applying the information in this booklet to teams and teambuilding will help the team to succeed.

To demonstrate the wide-ranging benefits of the MBTI tool, this booklet covers six core issues affecting teams today: communication, team culture, leadership, change, problem solving/conflict resolution, and stress. The type descriptions include sample responses of each of the sixteen types to each of the core issues. Team members can use these examples to enhance their type awareness and thereby increase both individual and team effectiveness.

# **Teams and Teambuilding**

A team is a group of two or more people working together to accomplish a task. This may seem obvious, yet many people when faced with the word team think only of sports. Just as each member of a sports team has a different role to play and skills to offer, so do members of work teams. The

MBTI tool provides a framework for understanding differences in what each team member brings to the team.

Teambuilding-as conducted with the help of the MBTI tool-is the process by which a group of individuals are encouraged to learn about themselves, each other, their leader(s), and how these components fit together to boost team success. Use this booklet to help initiate teambuilding or to continue to reinforce a teambuilding effort that has already begun.

# The MBTI® Tool and Its Benefits to Teams

The MBTI tool reflects individual preferences for source of energy (Extraversion-Introversion), taking in information (Sensing-Intuition), decision making (Thinking-Feeling), and lifestyle (Judging-Perceiving). Sixteen unique personality types result from the combinations of these four MBTI preference dichotomies. This booklet will help you understand your type and the relationship of your preferences to the way you and other team members interact. As you read the descriptions, remember that although your preferences may lead you to behave in certain predictable ways, organizational and personal goals may also induce you to act in ways that are different from your natural preferences.

# The MBTI® Tool and Team Effectiveness

The MBTI tool specifically aids team members by

- Fostering openness and trust
- Providing a neutral and affirmative language with which to discuss differences
- Underscoring the value of diversity
- Teaching team members to value and work with the strengths of others
- Helping increase productivity by aligning an individual's MBTI preferences to particular team tasks
- Identifying team assets and blind spots

- Supplying a framework in which team members can better understand and manage
  - Communication
  - Team culture
  - Leadership
- Change
- · Problem solving/conflict resolution
- Stress

According to Mary McCaulley (1975), the MBTI tool allows us to make predictions about team effectiveness based on psychological type, such as the following:

- The more similar the types on a team, the more readily the team members will understand each other
- The more dissimilar the types on a team, the slower the understanding
- Groups with high similarity will reach decisions more quickly but are more likely to make errors due to inadequate representation of all viewpoints
- Groups with members of many different types will reach decisions more slowly (and painfully) but may reach better decisions because more viewpoints are covered
- Teams with only a single representative of a certain preference (e.g., only one Introvert) may fail to appreciate the gifts/skills associated with that preference and may view that member as different
- Teams that come to appreciate and use different types may experience less conflict

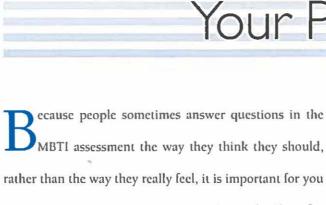

Successful teams with members of many different types promote the personal development of team members by encouraging learning from the gifts of other types

This booklet gives you the opportunity to explore psychological type as it relates to you, your team, and your team's leadership. The information provided can serve as a guide to understanding and enriching team relationships by helping each team member make the most of his or her distinctive style. Use it to make your day-to-day work on the team more rewarding and enjoyable.

# Key Things to Remember About the MBTI® Tool

Keep the following things in mind when exploring type to ensure a positive experience for all:

- Type is about preferences; type is not about knowledge, skills, or abilities
- There are no right or wrong preferences
- No preferences are unhealthy or inappropriate
- Type is not an excuse—we can all use every function (Sensing-Intuition, Thinking-Feeling) and every attitude (Extraversion–Introversion, Judging–Perceiving)
- Each team member is the best judge of his or her own preferences
- Type should empower team members, not limit them

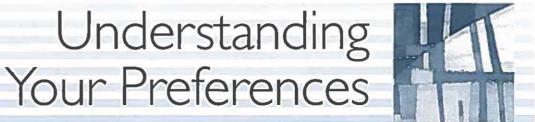

to confirm your assessment results. This is the "best-fit" process.

## **MBTI®** Preferences

## Extraversion

People with a preference for Extraversion direct and receive energy from the outer world. Extraverts are more likely to

- Prefer action over reflection
- Talk things over in order to understand them
- Prefer spoken communication
- Share their thoughts freely
- Act and respond quickly
- Extend themselves into the environment
- Enjoy working in groups
- · Put themselves in the foreground

# **Examining Your MBTI® Preferences**

As part of the process of validating your best-fit type, vou will want to read over the descriptions in the "MBTI® Preferences" chart below. Examine the items under each heading-Source of Energy, Taking in Information, Decision Making, and Lifestyle-and mark those statements that are most like you. Then compare opposing preferences, looking to see if you have marked more items under Extraversion or Introversion, Sensing or Intuition, and so on. This will help you both understand and confirm your bestfit type. Remember, you are the best judge of what your preferences are.

### Source of Energy

#### Introversion

People with a preference for Introversion direct and receive energy from the inner world. Introverts are more likely to

- Prefer reflection over action
- Think things through in order to understand them
- Prefer written communication
- · Guard their thoughts until they are (almost) perfect
- Consider and think deeply
- Defend against external demands and intrusions
- · Enjoy working alone or with one or two others
- Stay in the background

### **MBTI®** Preferences continued

#### **Taking in Information**

#### Sensing

People with a preference for Sensing like to take in information in a precise and exact manner. Sensing types are more likely to

- Like hearing facts and details first
- Prefer the tried and true
- Emphasize the pragmatic
- Desire predictability
- See problems as needing specific solutions based on past experience
- Focus on the practical applications of a situation
- Want to know what is
- Value realism

#### Intuition

People with a preference for Intuition like to take in information in an ad hoc, innovative manner. Intuitive types are more likely to

- Like hearing general concepts first
- Prefer the new and untried
- · Emphasize the theoretical
- Desire change
- See problems as opportunities to innovate based on inspiration
- Focus on the future possibilities of a situation
- · Want to know what could be
- Value imagination

#### Thinking

People with a preference for Thinking seek general truths and objectivity when making decisions. Thinking types are more likely to

- Seek logical clarity
- Question first
- Have an interest in data
- Know when logic is required
- Prefer things to be objective
- Remain detached when making a decision, weighing the pros and cons
- Search for the flaws in an argument
- Strive to be fair

# Feeling

**Decision Making** 

People with a preference for Feeling seek individual and interpersonal harmony when making decisions. Feeling types are more likely to

- Seek emotional clarity
- Accept first
- Have an interest in people
- Know when support is required
- Prefer things to be personal
- Remain personally involved when making a decision, weighing values
- Search for points of agreement in an argument
- Strive to be compassionate

#### Lifestyle

#### Judging

People with a preference for Judging like to come to closure and to act on decisions. Judging types are more likely to

- Want things to be settled and ordered
- Finish tasks before the deadline
- Like goals and results
- Limit surprises
- Draw conclusions
- Quickly commit to plans or decisions
- See routines as effective
- Trust the plan

#### Perceiving

People with a preference for Perceiving like to remain open and adapt to new information. Perceiving types are more likely to

- Want things to be flexible and open
- Finish tasks at the deadline
- Like to see what turns up
- Enjoy surprises
- Stay tentative
- Reserve the right to change plans or decisions
- See routines as limiting
- Trust the process

# Examining Your MBTI® Preferences at Work

Next, think about your preferences regarding work situations. As you did on the "MBTI® Preferences" chart, look through the descriptions on the "MBTI® Preferences at Work" chart below and mark those that best capture how you are at work. Then compare opposing preferences, looking to see if you have marked more items under Extraversion or Introversion, Sensing or Intuition, and so on. Once again, this will serve you in understanding and confirming your best-fit type.

MBTI® Preferences at Work		
At work, Extraverts are more likely to	At work, Introverts are more likely to	
Speak-think-speak	Think-speak-think	
Favor an energetic atmosphere	<ul> <li>Favor a calm atmosphere</li> </ul>	
Desire an action-oriented leader	<ul> <li>Desire a contemplative leader</li> </ul>	
<ul> <li>Have an enthusiastic approach to change</li> </ul>	<ul> <li>Have a measured approach to change</li> </ul>	
Prefer to start the problem-solving process as a group	<ul> <li>Prefer to start the problem-solving process individually</li> </ul>	
Find too little interaction stressful	<ul> <li>Find too much interaction stressful</li> </ul>	
At work, Sensing types are more likely to	At work, Intuitive types are more likely to	
Talk in specific terms	<ul> <li>Talk in general terms</li> </ul>	
Value being surrounded by realistic people	<ul> <li>Value being surrounded by imaginative people</li> </ul>	
Want pragmatic leadership	<ul> <li>Want visionary leadership</li> </ul>	
Proceed step by step during change	<ul> <li>Jump from step to step during change</li> </ul>	
Prefer to employ established problem-solving methods	<ul> <li>Prefer to create new problem-solving methods</li> </ul>	
• Feel stressed when overloaded with abstract theories	<ul> <li>Feel stressed when overloaded with specific details</li> </ul>	
At work, Thinking types are more likely to	At work, Feeling types are more likely to	
Offer objective advice	Offer supportive advice	
• Want standards that are fair to people	<ul> <li>Want standards that are sympathetic to people</li> </ul>	
Desire just leadership	Desire compassionate leadership	
Prefer change to be logical	<ul> <li>Prefer change to be harmonious</li> </ul>	
Look at problems in terms of cause and effect	<ul> <li>Look at problems in terms of their impact on people</li> </ul>	
Find incompetence stressful	Find lack of cooperation stressful	
At work, Judging types are more likely to	At work, Perceiving types are more likely to	
Want communication to be systematic	<ul> <li>Want communication to be spontaneous</li> </ul>	
Prefer their environment to be scheduled	Prefer their environment to be flexible	
Like a leader to be planful	<ul> <li>Like a leader to be adaptable</li> </ul>	
Take an outcome-oriented approach to change	<ul> <li>Take a process-oriented approach to change</li> </ul>	
Be comfortable moving toward a fixed solution	<ul> <li>Be comfortable keeping options open</li> </ul>	
Find indecisiveness stressful	Find premature closure stressful	

# Relating Your MBTI® Preferences to Six Core Team Issues

to look at the charts on the next several pages. This will give you yet another opportunity to confirm and understand your preferences and to determine your best-fit type.

After you've had a chance to consider and begin to determine your preferences on the earlier charts, you will want

Relating MBTI® Preferences to Communication		
In communicating, Extraverts are more likely to	In communicating, Introverts are more likely to	
<ul> <li>Share things openly</li> </ul>	<ul> <li>Keep things to themselves</li> </ul>	
<ul> <li>Seek large-group interaction</li> </ul>	<ul> <li>Seek small-group interaction</li> </ul>	
<ul> <li>Be enthusiastic and activity oriented</li> </ul>	<ul> <li>Be calm and reserved</li> </ul>	
Want fellowship	Want autonomy	
In communicating, Sensing types are more likely to	In communicating, Intuitive types are more likely to	
Enjoy practical conversations	<ul> <li>Enjoy clever conversations</li> </ul>	
<ul> <li>Move from point to point in a linear fashion</li> </ul>	<ul> <li>Skip around as they make connections</li> </ul>
